project:java Mini project
topic: credit card billing payment reminder system
Name: Jaiakash
rollno: 25bcs119
Department :b.sc . computer science I-B

Introduction

- **Credit card payments must be made on time**
- Helps remindusers about paymentstatus
- Shows if payment is due soon, today, or overdue

Objective

- **Create a reminder system using Java**
- Compareduedate andcurrentdate
- Display appropriate reminders

Tools & Concepts Used

- **Java Programming Language**
- ScannerClass
- Conditional Statements (if-else)

Program Logic

- **1. Input due date**
- 2. Inputcurrentdate
- 3. Compare dates
- 4. Display message

Code Explanation (1)

- **Imports java.util package**
- Scanner isusedfor input
- main() is program entry point

Code Explanation (2)

- **Declares variables dueDate and currentDate**
- Takes user input for both

Code Explanation (3)

- **If currentDate < dueDate**
- → Payment due soon

Code Explanation (4)

- **If currentDate == dueDate**
- → Payment due today

Code Explanation (5)

- **If currentDate > dueDate**
- → Payment overdue

Closing Code

- Scanner is closed to prevent memory leaks

Sample Output

- **Input: Due Date = 20, Current Date = 18**
- Output: Payment due soon

Advantages

- **Easy to use**
- Avoids latepayments
- Can be extended

Source code:

```
import java.util.Scanner;

public class Reminder {
 public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        int due, current;

        System.out.print("Enter due date: ");
        due = sc.nextInt();

        System.out.print("Enter current date: ");
        current = sc.nextInt();

        if (current >= due - 3 && current <= due)
            System.out.println("Reminder: Pay your bill!");
```

```
else if (current > due)

System.out.println("Overdue!");
            else
             System.out.println("no reminder ");
                    Sc.close();
  }
}
```

Reminder

```
ter due date: 20
ter current date: 18

eminder: Pay your bill!
```

Reminder

```
Enter due date: 20
Enter current date: 20

Reminder: Pay your bill!
```

Reminder

```
ter due date: 20
ter current date: 25

verdue!
```

Reminder

```
Enter due date: 20
Enter current date: 10

No reminder.
```

Conclusion

- **Demonstrates Java basics**
- Useful reminder system
- Can be improved with GUI and notifications
